a
Generalized eigenvalue spectrum
λ_i [(m s^{-1})$^{-2}$]
Ordered eigenvalue index
10 km
20 km
30 km
b
Extreme directions at 10 km
Depth (m)
Unit depth-RMS perturbation shape
λ_{max}
λ_{min}
c
Full and quadratic mismatches
Array mismatch D
Depth-RMS error (m s^{-1})
Full, error A
Quadratic, error A
Full, error B
Quadratic, error B
d
Sharp ordering threshold
Output-error ratio D_A/D_B
Norm ratio divided by τ
Full, 10 km
Full, 20 km
Full, 30 km
Quadratic: x^2
