a
Zero-inventory initial errors
$E_A = 0.04$, $E_B = 0.05$
Concentration error
Position (km)
Error A
Error B
b
Error in the regional mean
5 days: ratio 4.005
Absolute output error
Lead time (days)
c
Projection to the correct inventory
Before projection
After projection
Relative to the unprojected error
0.870
4.000
Field RMS
Squared output error
d
Spatial convergence at five days
Finite-volume solution
$O(\Delta x^2)$
Maximum absolute output error
Cell width (m)
